SHELBY F-150

THE ULTIMATE TRUCK

In 1962, Carroll Shelby put a Ford V8 engine into a European racecar chassis and went on to beat the world's best teams AND claim the first and only FIA World Sportscar championship for an American company. Ever since there's not been another company more synonymous with developing high performance Ford products than Shelby American.

Shelby American is pleased to offer the 2017 version of the highly successful Shelby F-150. For Ford truck enthusiasts, it's based on the best-selling Ford F-150 with a powerful, naturally aspirated 395HP, 5.0L V8 engine that can be supercharged to over 750HP. We've added more than 45 Shelby proprietary high-performance upgrades.

Starting with unmistakable Shelby striping and badging, the Shelby F-150 features a unique polycarbonate

hood and ram air intake system to help optimize engine temperatures under the toughest conditions. Underneath, the Shelby F-150 rides on BDS suspension with Fox shocks. This proprietary system provides the ability to tune your Shelby F-150 from luxury-car-smooth to hard core off-road handling. It also features bigger 18" Shelby engraved alloy wheels and Baja-proven BFGoodrich K02 tires. The Shelby-tuned, BORLA performance dual-exhaust system with black ceramic tips help make the truck look and sound like nothing else on the road.

Six distinctive colors will be offered and they will be available in either a 395HP Naturally Aspirated version or an amazing 750HP Supercharged version. Each will be fitted with two Shelby CSM serial number plaques certifying their authenticity and limited availability.

2017 Shelby F-150
